LOGISTICS

*We have worked with Tom and Far and Wide since we started in 2005, and they have provided excellent logistics support to help us secure our position as a leading mining procurement company to our global clients such as BHP Billiton and Macmahon. Far and Wide leave no stone unturned and provide a seamless service to make sure our goods arrive on time.*

# Committed to excellence

**Far and Wide Limited** are experienced logistics experts with over 20 years involvement in the management of global transportation programmes for a wide range of companies from race & rally teams (with their exacting timescales) through to mining companies and their support services suppliers.

Our commitment to quality means that we work closely with our clients to become part of their team, which reduces reaction times, allows planning to be proactive rather than reactive and ultimately gives us the tight operational control we plan into every transportation programme.

Consequently we are able to design integrated programmes for road, sea or air, as well as managing urgent, just-in-time shipments.

## Air freight

We offer cost effective solutions to your Air Freight requirements.

Our experienced import/export staff are knowledgeable and skilled in the use of options available to help meet your requirements, whether for individual shipments or for larger, managed programmes.

We offer a complete Door-to-Door/Airport-to-Airport service (Delivered Duty Paid or Unpaid), which includes all customs formalities at both origin and destination.

## Ocean freight

We can arrange ocean shipments of cargo of any size or description, by container or conventional service, to or from any point in the world.

Our in-depth knowledge of current trade conditions and carrier capabilities allows us to identify the most suitable method and route for each shipment, and to negotiate the most favourable terms to reflect our clients' needs.

Prompt and accurate documentation is vital for ease of entry to any country and in this respect we work closely with our clients to ensure there are no unnecessary holdups.

## A WORLDWIDE NETWORK

We could not offer our services without a reliable worldwide network of agents, and over the years we have steadily built a supply chain to meet both our own and our clients' exacting standards.

In this respect we have an excellent and close working relationship with a large airfreight company at London Heathrow, and can offer a 10,000ft<sup>2</sup> warehouse facility and immediate access to airport flights around the world.
